Listing and Amendments to the Claims

1. (Currently amended) Method for modifying a play list in an audio and/or video apparatus, comprising the steps of:

- displaying in a first area of a screen a representation of at least part of available tracks, only one occurrence of each available track appearing in the first area,
- displaying in a second area of the screen at least part of the current play list,
- determining a track to be considered upon a first action introduced by a user,
- indicating the track to be considered by a specific representation in the first area of the screen associated with the track to be considered,
- repeating the steps of determining and indicating to enable several occurrences of the same track to be added to the play list, all the occurrences of same track appearing in the first area, the considered track being highlighted in the first area,
- if the user introduces [-upon] a second action [introduced by the user,] for removing the track to be considered and highlighted [while represented] in the first area of the screen, and if several occurrences of the track to be considered are displayed in the second area displaying at least part of the play list, removing the last occurrence of the track to be considered in the play list displayed in the second area.

2. (Previously amended) Method according to claim 1, wherein the first action and the second action are actions introduced on a remote control sending signals to the apparatus.

3. (Previously amended) Method according to claim 1, wherein said specific representation of the track to be considered is highlighting the representation in the first area of the screen associated with the track to be considered.

PATENT

4. **(Currently amended)** Method for modifying a play list in an audio and/or video apparatus, comprising the steps of:

- generating video signals defining a screen with a first area displaying a representation of at least part of available tracks and a second area displaying at least part of the current play list, only one occurrence of each available track appearing in the first area.

- determining a track to be considered upon receiving a first signal introduced by a user from a user interface,

- indicating the track to be considered by generating video signals defining a specific representation in the first area of the screen associated with the track to be considered, the considered track being highlighted in the first area,

- if the user introduces [receiving] a second signal [introduced by the user] from the user interface, for removing the track to be considered and highlighted [while represented] in the first area, and if several occurrences of the track to be considered are displayed in the second area displaying at least part of the play list, removing the last occurrence of the track to be considered in the play list displayed in the second area.

5. **(Original)** Method according to claim 4, wherein the user interface receives signals from a remote control.

6. **(Previously amended)** Method according to claim 4, wherein said specific representation of the track to be considered is highlighting the representation in the first area of the screen associated with the track to be considered.

7. **(Currently amended)** Audio and/or video apparatus having a media reader to read a medium where the data are organized in tracks, and a memory able to store a play list, comprising:

- video means generating video signals defining a screen with a first area displaying a representation of at least part of the tracks and a second area displaying at least part of the play list, only one occurrence of each available track appearing in the first area.

CUSTOMER NO.: 24498
Attorney Docket No. PA020014

PATENT

- a user interface for receiving a first signal determining a track to be considered, wherein the video means are meant to indicate the track to be considered by generating video signals defining a specific representation in the first area of the screen associated with the track to be considered, the considered track being highlighted in the first area.

- control means for removing the track to be considered and highlighted ~~[while represented]~~ in the first area of the screen, and if several occurrences of the track to be considered are displayed in the second area displaying at least part of the play list, said control means removing the last occurrence of the track to be considered in the play list upon receiving a second signal introduced by the user from the user interface.

8. (Original) Audio and/or video apparatus according to claim 7, wherein the user interface receives the first signal and the second signal from a remote control.

9. (Previously amended) Audio and/or video apparatus according to claim 7, wherein said specific representation of the track to be considered is highlighting the representation in the first area of the screen associated with the track to be considered.

10. (Currently amended) Method for modifying a list of items selected by a user from a given set, comprising the steps of:

- displaying in a first area a representation of items of the given set, only one occurrence of each item appearing in the first area
- displaying in a second area a list representing at least part of the previously selected items,
- determining an item to be considered upon a first action introduced by the user,
- indicating the item to be considered by a specific representation in the first area of the item to be considered, the considered item being highlighted in the first area
